

As a resident of the Washington metro area, i can't believe you would do anything to stop a service that actually helps decrease traffic congestion in this area. I rely on XM Traffic to avoid backups. On top of it's usefulness, i think XM is fantastic. The variety is of music, talk, comedy, etc is unbelievable an unavailable elsewhere. Anyone who listens to XM is will never go. Besides, i pay for it, so why can't i listen to what i want?
